Rapid Prototype Program

Get Prototypes Pronto

When it comes to product development or design improvement, time is critical. Product development cycles are shorter than ever. And when a field problem occurs, design improvements must be made immediately. That's why Parco developed its Rapid Prototype Program. Through that program, Parco can provide prototype parts in as few as three working days.

When it comes to delivering prototypes rapidly, Parco leaves the competition in the dust. After completing a six-month trial of its Rapid Prototype Program, Parco consistently delivered prototypes and secured customer approval before competitors were able to even provide samples.

Three Simple Options

Parco's Rapid Prototype Program offers three options to provide the prototypes you need, when you need them.

1. Standard O-rings or Back-up Rings

Using our existing molds, we can provide you with up to 50 standard O-rings or contoured back-up rings within three working days.

2. Non-standard O-rings or Simple Custom Shapes

Using our unique single-cavity mold design, we can provide you with up to 50 non-standard O-ring prototypes or 50 custom molded prototypes in a simple shape within five working days.

3. Complex Custom Shapes or Ground Parts

Our extensive molding experience allows us to provide you with up to three custom molded prototypes in a complex shape in five working days. We can also grind up to three large custom prototypes from molded slugs in five working days. That option eliminates the need for an expensive mold.

Help your customers cross the finish line first with Rapid Prototypes from Parco.

Rely on Parco

Parco is a leading manufacturer of high-performance seals. We specialize in developing proprietary elastomeric compounds and bonding techniques. Parco's seals are available in more than 800 compounds.

Founded in 1941, Parco was the first manufacturer to specialize in O-rings. Our 154,000 square-foot facility is one of the largest rubber seal plants in the world. Parco also manufactures custom-molded elastomeric products, including rubber-to-metal

bonded parts. Our quality management system is certified to to ISO 9001, ISO/TS 16949, AC7115, and AS9100.

Parco products are available throughout the world from a network of knowledgeable distributors.

Parco Delivers Faster

For more information on our Rapid Prototype Program, please contact a Parco customer service representative or one of our distributors. Parco can provide sample parts in as few as three working days.

Rapid Prototype Program

	1. Standard O-rings or Back-up Rings	2. Non-standard O-rings or Simple Custom Shapes ³	3. Complex Custom Shapes or Ground Parts
Part Sizes	All industry standard sizes	Non-standard O-rings: • 1/32 to 22 inches inside diameter Simple custom molded shapes: • 1/32 to 7 inches inside diameter	Inside diameter: • 2 to 6 inches Outside diameter: • 5 to 8 1/2 inches Length: • 1/4 to 8 inches
Compounds	Any Parco standard or special compound	Any Parco standard or special compound	Various
Quantity, Max.	50	50	3
Price ¹	\$100	\$100	\$250
Tool Charge	\$0	\$250	\$0
Lead Time, Days ²	3	5	5

¹For standard O-rings or back-up rings, non-standard O-rings, or simple custom shapes, price is \$100 per lot or the value of the parts, whichever is greater. For complex custom shapes and ground parts, price is \$250 each.

²Lead times shown above are for any Parco standard or special compound. Lead time may be longer for other compounds.

³Sizes exceeding 5 inches inside diameter may be subject to higher tooling costs.
